

ANDREW HUNTER
EQUIPMENT CATALOGUE

JUNE 2015

PHILOSOPHY

All of the packages are production tested, ready to shoot packages. While others advertise the brand names behind their cameras but leave you out in the cold with not enough media, batteries or industry standard accessories, the camera packages within will make sure you are well taken care of on your shoot.

We're cinematographers and focus pullers, we know what you need and the frustration that comes when you don't get it.

Below you will find some pre-made packages, priced and ready to go. If your needs are more complicated, please contact me and we can work out a package that works for you.
